Hello, my name is Brian Tracy. I am an Interface Ace with diverse skills in UI disciplines. I possess expertise in developing code utilizing Node.js and front-end frameworks such as React and Angular. I have experience in conditional rendering, web accessibility, responsive design, and 508 compliance. My proficiency extends to the CSS box model, semantic colors, spacing, and managing components, master pages, layouts, and dashboards.

I excel in managing CSS and HTML output, ensuring stable content presentation across all devices. I specialize in investigating, improving, and elevating interfaces to their cleanest, clearest, and most inviting potential.

TECHNICAL SKILLS

JavaScript ES6, TypeScript, Node.js, React, Angular, HTML5, CSS, SCSS, Responsive Design
